## COURSE OVERVIEW

This two-day boot camp is designed to empower a wide range of technology workers with the knowledge and skills needed to take full advantage of Splunk. This Splunk training course is exercise-intensive and is for individuals looking to develop a deeper understanding of the tool. Our continuous hands-on lab classroom format and real-world practice scenarios cement your new skills with Splunk's various applications and leave you prepared to properly collect, analyze and utilize your machine data.

### COURSE OUTLINE

#### Part 1: Introduction to Splunk

1. What's Splunk?
2. Authentication Methods
3. Access Controls & Users
4. Products, Licensing, and Costs
5. Quick Tour Guide: User Interface
6. Exercise: Lab Environment and Configuration

#### Part 2: Indexes

1. Splunk Data
2. What are Indexes?
3. What are Indexers?
4. Exercise: Create Your First Index
5. Search-Head
6. Index Clusters
7. Index Pipeline
8. Exercise: Upload Data Manually
9. Events
10. Fields & Field Extraction
11. Exercise: Using the Field Extractor Tool
12. Forwarders
13. Metrics
14. Exercise: Using the Forwarder to Send Data
15. Removing Data

#### Part 3: Splunk Architecture

1. Components of Splunk Deployments
2. Deployment Scenarios

#### Part 4: Search Processing Language

1. What is Search Processing Language (SPL)?
2. Searching Operators
3. Search Commands
4. Search Pipeline
5. Exercise: Search Examples
6. Subsearches
7. Commonly Used Search Commands
8. Exercise: Search Examples II
9. Drilldowns
10. Lookups
11. Exercise: Using Lookups
12. Optimize Searches
13. Exercise: Search Examples III

#### Part 5: Dashboard & Visualizations

1. Dashboards in Splunk
2. Creating Dashboards
3. Visualization Types
4. Search as Reports
5. Dashboards
6. Exercise: Creating a Dashboard
7. Drilldown
8. Forms
9. Exercise: Add Input Forms
10. Exercise: Drilldown
